Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, a type of window or door having both slidable sashes: Figure 3

Species II, a type of window or door having an outdoor fixed sash: Figures 12-14

Species III, a type of window or door having an indoor fixed sash: Figures 15-17

Currently, Figures 1 and 2 are illustration of prior arts, Figures 5 and 9 are generic to Species I-III, and Figure 18 is generic to Species II and III.

If applicant's elected species I then applicant's further required to elect a Figure of a type a window frame as listed below:

Figure 4 (a bottom window frame having a flat top surface)

Figure 6 (a bottom window frame having a sloped concave surface on the indoor surface of the frame)

Figure 7 (a bottom window frame having a sloped convex surface on the indoor surface of the frame)

Figure 8 (a top window frame having a flat top surface)

Figure 10 (a top window frame having a sloped concave surface on the indoor surface of the frame)

Figure 11 (a top window frame having a sloped convex surface on the indoor surface of the frame)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and a Figure of a type of a window frame for prosecution on the merits to which the

claims shall be restricted if no generic claim is finally held to be allowable. Currently,

Claims 1 and 21 are generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. John Smith-Hill on April 28, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 10/070,980
